

INBODY 570

Advanced Analysis

GIVE YOUR CLIENTS AN ADVANCED INBODY CONSULT. BESIDES FAT AND MUSCLE MASS, FLUID ACCUMULATION IS MEASURED. WHICH CAN BRING TO LIGHT HIDDEN HEALTH PROBLEMS.

Go beyond muscle & fat

The InBody 570 goes beyond traditional body composition analysis. It not only analyzes how much fat and muscle you have, but it also measures your Total Body Water and divides it into Intracellular Water and Extracellular Water- values important for understanding a user's fluid distribution in medical, wellness, or fitness contexts.

With these water values, you can identify and track inflammation, swelling, and even injuries with ECW/TBW Analysis while monitoring how this ratio changes over time with the Body Composition History chart.
